From the name itself, it is clear that artificial fur is the fashion fabric that is manufactured using fake fur. Also known as faux fur, artificial fur is made from acrylic polymer or synthetic fiber. Polymer technology is used to manufacture artificial fur that makes it look like natural and real fur.

Increased introduction of modern artificial fur products such as fashion apparel and home decorative items and changing lifestyles of humans especially in the developing economies are the major factors fostering growth of the market. Rising regarding changing fashion trends via various social networking platforms and growing brand awareness will further create lucrative growth opportunities for the market. Growing number of celebrity endorsements, rising penetration of e-commerce platforms, growing awareness about animal poaching and cruelty and growing focus of the major manufacturers on technological advancements are other important factors bolstering the market growth rate.

However, intense pricing pressure over the manufacturers and fluctuations in the prices of raw materials will pose a major challenge to the growth of market. Availability of counterfeit products made of cheap raw materials will further derail the market growth rate. Lack of strong distribution network in the backward areas will further restrict the scope of growth.
