Bread Improver Market

Bread improver is a combination of flour-based components and food additives made from a mixture of enzymes, emulsifiers, and soy and malt flour. They are used to modify dough characteristics by activating the gluten, alleviating the baking process, and enhancing functional properties. Bread improver aids in better gas retention, faster leavening, stronger structure, and longer shelf life. It also improves the taste, color, texture, composition, and tenderness of the bread.
