

Agricultural Micronutrients Market Analysis by Industry Size, Future Evolution, Scope and Regional Analysis by 2022-2027

Agriculture micronutrients are essential plant nutrients added to the soil in small quantities.

STE R SHERIDAN, WYOMING, UNITED STATES, June 27, 2022

/EINPresswire.com/ -- The IMARC

Group provides extensive analysis of the agricultural micronutrients industry covering the market trends, investment opportunities, growth trends, statistics, and industry prospects. The report offers a comprehensive analysis of the industry, which comprises insights on

[agricultural micronutrients market size](#), share, trends, analysis, growth, demand, statistics, and overview. The report also includes competitor and regional analysis, and contemporary advancements in the global market.

Agricultural Micronutrients Market

Note: We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report. The market is segmented by size and region. The report provides an analysis of the key trends in each sub-segment of the market, along with forecasts at the global and regional level from 2022-2027. The report also includes competitive landscape of major key players in the industry along with emerging trends in the market.

Informed covered in the report:

Historical market data from 2016-2021

CAGR of the market during the forecast period 2022-2027

Detailed information on factors that will drive market growth during the next five years

Precise estimation of the Keyword market size and its contribution to the parent market

Upcoming market trends and changes in consumer behavior

A thorough analysis of the market's competitive landscape and detailed information on key

players

Comprehensive details of factors that will challenge the growth of smart meters market key players

Note: We are updating our reports, If you want the latest primary and secondary data (2022-2027) with Cost Module, Business Strategy, Competitive landscape, etc. Click request free sample report, the report will be delivered to you via email within 24 to 48 hours."

Agriculture micronutrients are essential plant nutrients added to the soil in small quantities. Boron, iron, zinc, molybdenum and manganese are some of the commonly used agricultural micronutrients. They are utilized to increase the yield and quality of agricultural products and are found in non-chelated and chelated forms. They also provide the essential nutrients required for optimal plant growth and development. They are widely used with soil, fertigation systems and foliar sprays. Micronutrients are mixed with dry and liquid fertilizers to provide uniform distribution of nutrients and promote plant metabolism.

Agricultural Micronutrients Market Trends:

The global agricultural micronutrients market is primarily being driven by the rising incidences of micronutrient deficiency in the soil. Agricultural micronutrients are essential for the overall growth of the plant, especially in soil with low organic matter and high calcium carbonate content. Moreover, the widespread adoption of zinc chelate-based agricultural products is providing a thrust to the market growth as zinc is essential for the production of auxins that facilitate growth and stem elongation in plants. Other factors, including the widespread utilization of fertilizers enriched with micronutrients for protection against insects and ultraviolet (UV) radiations, along with the implementation of favorable government policies promoting the use of environment-friendly agrochemicals, are anticipated to drive the market toward growth.

As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the industry behaviors of the consumers globally and our estimates about the latest market trends and forecasts are being done after considering the impact of this pandemic.

Competitive Landscape with Key Players:

ATP Nutrition (Concentric Agriculture Inc.)

Balchem Corporation

BASF SE

Compass Minerals International
Coromandel International Ltd. (Murugappa Group and EID Parry)
Corteva Inc.
Helena Agri-Enterprises LLC (Marubeni Corporation)
Nufarm Canada, Stoller USA Inc.
The Mosaic Company
Valagro SpA (Syngenta Crop Protection AG)
Yara International ASA
Zuari Agro Chemicals Ltd.

Market Segmentation:

Breakup by Type:

Zinc
Boron
Iron
Manganese
Molybdenum
Others

Breakup by Crop Type:

Cereals
Pulses and Oilseeds
Fruits and Vegetables
Others

Breakup by Form:

Chelated
Non-Chelated

Breakup by Application:

Soil
Foliar
Fertigation
Others

Breakup by Region:

North America (United States, Canada)

Europe (Germany, France, United Kingdom, Italy, Spain, Others)

Asia Pacific (China, Japan, India, Australia, Indonesia, Korea, Others)

Latin America (Brazil, Mexico, Others)

Middle East and Africa (United Arab Emirates, Saudi Arabia, Qatar, Iraq, Others)

Key highlights of the report:

Market Performance (2016-2021)

Market Outlook (2022-2027)

Market Trends

Market Drivers and Success Factors

Impact of COVID-19

Value Chain Analysis

Comprehensive mapping of the competitive landscape

If you need specific information that is not currently within the scope of the report, we will provide it to you as a part of the customization.
