The hematology analyzers and reagents market consists of sales of hematology analyzers and reagents. Hematology analyzers provide complete blood count (CBC) with a three-part differential white blood cell (WBC) count and can detect small cell populations to diagnose rare blood conditions, measure cell morphology.

[Global Hematology Analyzers and Reagents Market Trends](#)

Hematology analyzers manufacturers are increasingly investing in the research and development of analyzers with microfluidics technology that use low volumes of samples and reagents. Microfluidics deal with the flow of liquids inside channels as small as a few micrometers. Low reagent consumption by hematology analyzers with microfluidics technology helps reduce operating costs significantly.
