The introduction of the 3D/4D ultrasound devices is the latest trend that is going to change the landscape of ultrasound devices and the equipment market. The 3D/4D technology ultrasound device provides real-time enhanced imaging of the internal anatomy/fetus, also enabling real-time volume imaging. This technology can also help in performing complex surgeries. The 3D/4D ultrasound device would also feature improved image visualization power, shorten examination time and decrease strain injury during the surgery.
