

Pencil Market Size expected to reach USD 22,512.1 million by 2028, at a CAGR Of 7.7% during 2022-28

The surge in sales of commercial & school supplies, which are utilised as an instructional tool for students all around the world, is driving demand for pencils

LONDON , UNITED KINGDOM, June 27, 2022 /EINPresswire.com/ -- The global [pencil market size](#) is valued USD 13,393.9 million in 2021 and is expected to reach USD 22,512.1 million by 2028, at a CAGR of 7.7% during the forecast period. Tiny fragments of pencil lead attach to the paper and leave a mark when you write as well as draw with a pencil. A pencil's "lead" isn't truly made of lead. It is created from graphite, a kind of carbon. The graphite is combined with clay to create long thin pencil lead. Growing educational systems around the world are raising public knowledge about health and the environment, resulting in a significant demand for environmentally friendly pencils. Consumers all over the world prefer environmentally friendly products since they can be recycled.

Impacts of the COVID-19 Pandemic on the Pencils Market:

Regional governments are taking steps to enhance transportation sustainability through initiatives & development projects. As people become more environmentally conscious, multimodal freight transportation services are becoming more popular. All of this is the outcome of government attempts to restrict people's movement in order to slow the transmission of the new coronavirus. In the short term, these issues are anticipated to impede the expansion of the pencil market.
