Launch of "Sekur" Including New SekurMail Solutions for Consumers & Businesses & Government with Private Domains Hosting.

SWISF is pleased announce that it has just completed an important milestone in upgrading its infrastructure for its Sekur solutions suite. The upgrade is connected to servers it has purchased and installed in Switzerland, in order to increase capacity and processing power for all its Sekur solutions: SekurSuite, SekurMail and SekurMessenger. With this infrastructure upgrade, the Company can now process billions of private and secure messages from up to 2 million users of SekurMessengers. In addition, the SekurMessenger application is now processing all messages and chat-by-invites by a factor of up to 50X faster. As the userbase increases, the Company will purchase more servers to process the demand. The new servers are state of the art and can handle the upcoming SekurVoice encrypted calls and SekurPro encrypted video conferencing solutions coming by year end 2022.

Sekur is now ready to expand its services globally. In particular, SekurMessenger is now being launched in Latin and Central America, Europe and South Asia, in addition to its existing launch in the USA.

Additionally, followers will benefit from a 25% discount Promo code for the first 5 years of subscription to SWISF at the time of signup. The average Facts Matter episode on EpochTV gets well over 150,000 views, with some reaching 250,000 views.

SWISF Launches "Chat-By-Invite" Using SMS Invites - Enables SekurMessenger Users to Chat with Non-Users Privately and Securely

On May 16th SWISF announced launching its "Chat-By-Invites" feature, allowing any Sekur user to invite any non-Sekur user to chat Privately and Securely, using Sekur's Swiss-hosted proprietary platform and technology.

SWISF SekurMessenger now comes with a proprietary feature and technology called "Chat-By-Invites". This feature allows a SekurMessenger user ("SM user") invite a non-SM user, or a group of non-SM users, to chat in a fully private and secure way, without the recipient ever having to register to SekurMessenger or download the app. At the end of the chat, the initiator of the conversation can remotely terminate the conversation and all traces of the conversation are deleted from all users, including the recipient.
