Ethereal Gold Dispensary is the first Dispensary and CBD retail business in Wisconsin that requires full-panel Certificates of Analysis (COAs) on all of their products. These certificates are extremely important for consumer safety [as they show if the products have been contaminated](#) with pesticides, residual solvents, mycotoxins, heavy metals, pathogens, listeria, potency, and

more. These are all things that can be extremely dangerous to consumers of cannabinoid products, as they can cause illness, poisoning, and in worse cases death.

“From our research, Ethereal Gold Dispensary is the first cannabinoid business to require full panel, third party tested COAs, not only in Wisconsin, but potentially nationwide. Full panel COAs are so important to your health and overall consumer safety. We’ve rejected 85% of what we thought were top line manufacturers, as they could not or would not provide legitimate, unaltered full panel COAs to meet our standards,” said Bill Fuchs, President. “Personally, as a consumer, I won’t buy whatever is on the shelf in the local gas station, C-store, head shops, or unverified CBD stores. I want to know what is going into my body when consuming CBD or other hemp derived products. It is as important to identify and avoid what I don’t want to ingest and go into my body. That is why we set higher than industry required standards at Ethereal Gold Dispensary.”

Ethereal Gold Dispensary is a premier online hemp-derived cannabinoid dispensary. They want their dispensary to feel like your home; the place you know you can go to ask questions, get truthful answers, and the support you need. They have an extensive vetting process on all products they sell. [More information on that process can be found here](#). Ethereal Gold Dispensary also strongly believes that anyone involved in the industry should be helping communities that have been affected by the “War on Drugs” — they donate 5% of all profits to charities that help these communities.

“We’re excited to be opening this retail pop-up location. We’ve had a great response from our online business on consumers that want products that they can know are safe. We recently attended the WI Cannabis Expo, and we heard similar things from the attendees there -- especially those that are currently dealing with products tainted by Fentanyl in their communities,” said Michael Fuchs, Communications Director / Handler. “Even if people are not interested in purchasing our products, we’re here to answer any questions they may have. If you want to know if that random product that you picked up from some corner store is safe, we’ll take a look at it for you. No charge. We won’t tell you not to take it, but we’ll tell you if we would and why.”
