The veterinary vaccines market consists of sales of vaccines and related services which are used for the treatment and prevention of diseases in animals. These veterinary vaccines reduce animal suffering and the transmission of microorganisms in the animal population. Veterinary vaccines are used to enhance the immunity power of animals by improving animal health, which also prevents the transmission of diseases from animals to humans.

Global Veterinary Vaccines Market Trends

Companies are increasingly looking for strategic partnerships and collaborations to enter into new geographies and to share the Research & Development projects. For example, in 2020, the Pirbright Institute, a UK-based animal disease research institute, partnered with ECO Animal Health, a UK-based Pharmaceutical company, and the Vaccine Group (TVG) to develop porcine respiratory and reproductive syndrome virus (PRRSV) vaccines. The vaccine group is a biotechnology company that develops animal vaccines and is based in Plymouth, UK. Similarly, MSD Animal Health, a division of Merck & Co with headquarters in the US, made a strategic partnership with Inovio. This partnership will help MSD Animal Health to combine its unique
