

Warehousing And Storage Market Players Optimize Operations With Big Data Analytics

The Business Research Company's Warehousing And Storage Market 2022 - Opportunities And Strategies – Global Forecast To 2030

LONDON, GREATER LONDON, UK, June 28, 2022 /EINPresswire.com/ --

Warehouse and storage companies are expanding their warehouse management to big data analytics as a

tool to optimize their warehouse operations. According to the [warehousing and storage market](#)

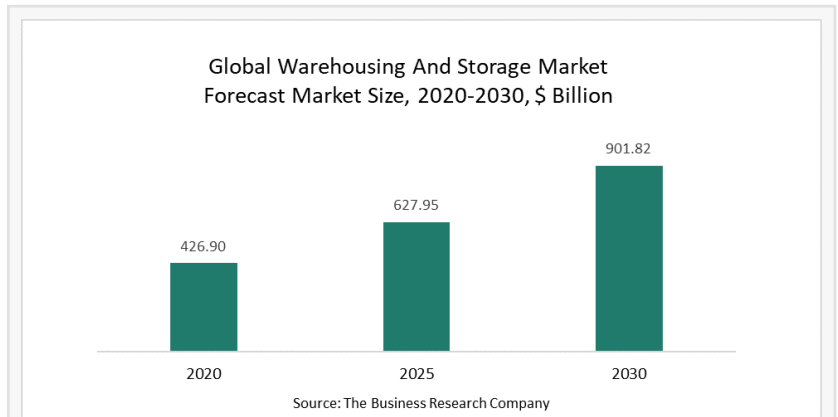

analysis, big data analytics refers to a process of examining large sets of data to obtain useful information. For instance, in December 2020, Amazon Web Services Inc. announced three new analytics capabilities that help improve the performance of Amazon Redshift data warehouses and allow customers to move and combine data easily across data stores. Likewise, warehousing company Deutsche Post DHL Group is optimizing the e-fulfillment for online shops during COVID-19 in 2020 with its play software solutions that uses algorithm analysis and data science. The analytical software allows the company to optimize picking routes and warehouse staff allocation.

TBRC's warehousing and storage market report shows that increasing development of IoT devices and features is driving the growth of the market in the forecast period. The IoT-powered warehouse facility allow fast collection and analysis of inventory data and helps staff members to track inventory volumes through a range of connected sensors and RFID tags. According to the warehousing and storage market research, IoT-powered warehouse and storage facility is driving the growth of the market in the forecast period.
