

# Spirometers Market Is Expected To Be Worth Nearly USD 1,731.50 million By 2028, Growing At A CAGR Of 10.15%

*Spirometers produce a pneumatograph, which is used to diagnose and monitor respiratory problems by measuring lung performance.*

LONDON , UNITED KINGDOM, June 29, 2022 /EINPresswire.com/ -- The global [spirometer market size](#) was valued at USD 880.10 million in 2021 and is expected to grow at a CAGR of 10.15% from 2022 to 2028. A spirometer is a medical instrument that is used to estimate the amount of air inhaled and expelled by the organs and to measure the air capacity of the lungs. Hypertension, chronic obstructive pulmonary disease (COPD), TB, cystic fibrosis, and silicosis can all be diagnosed using this equipment. It also determines whether pollutants in the environment have an impact on lung function and aids in the diagnosis of dyspnea and other lung-related issues.

## The Spirometer Market - Growth Factors

COPD is becoming increasingly common as a result of rising air pollution levels as well as environmental changes, and it is a major factor driving the [global Spirometers market growth](#). Furthermore, the rise in the senior population, which is projected to lead to more health difficulties, as well as the technological change toward smartphone-based data collecting, which offers greater accuracy and efficiency in test analysis, are expected to drive market expansion. The importance of identification and treatment in the treatment of these disorders cannot be

overstated. Spirometry is an important tool in this regard, as it aids in reducing the severity of the illness and preventing misdiagnosis. As a result of the rising prevalence of such respiratory disorders, the Spirometers Market is expected to expand.

### The Spirometer Market – Segmentation

The Global Spirometers Market on the basis of Product Type, which is further fragmented into Consumables and Accessories, Devices, and Software. On the basis of Modality, the market is categorized into Desktop, Table Top, and Handheld. On the basis of Mechanism, the market is segregated into Flow Sensing Spirometers and Peak Flow Meters. On the basis of Application, the market is classified into Asthma, COPD, Others. On the basis of End User, the market is bifurcated into Hospital and Clinics and Home Care Setting.

Spirometers Market By Regional Analysis

### The Spirometer Market Trend:

- Advanced spirometers with improved functions and design are being developed by companies.

### Restraining factors of the Spirometer market:

- The time it takes to complete the examination is a huge major hurdle, while the market's requirement for trained personnel and the risk of error is a major issue.

### The Spirometer Market –Regional Analysis

Due to the sheer greater incidence of obstructive pulmonary disease, North America leads the spirometer market. Additionally, owing to the improved primary care programmes for early detection and management of chronic respiratory disorders like as asthma and COPD, Asia-Pacific is predicted to rise significantly throughout the forecast period.

### Related Reports:

Blood Processing Devices and Consumables Market by product type (Blood Processing Devices (Blood Cell Processors, Blood Grouping Analyzers, Blood Bank Freezers and Refrigerators, Blood

Warmers, Hematocrit Centrifuges, Others)), Blood Processing Consumables (Blood Grouping Reagents, Slides, Blood Administration Sets, Coagulation Reagents, Blood Filters, Blood Lancets, Blood Bags, Blood Collection Tubes, Sedimentation Tubes, Others)), end-user ( Hospitals, Clinics, Blood Banks, Research Centers, Others) and Geography
