HIT Holdings is to enter a strategic partnership with BeMotion Inc. to expand and accelerate the commercialization of the DCN vending technology.

NEW YORK, NEW YORK, UNITED STATES, June 29, 2022 /EINPresswire.com/ -- [HIT Holdings](https://www.einpresswire.com/) Inc. is pleased to announce that it has entered into a strategic partnership with [BeMotion Inc](https://www.bemotion.com/) to accelerate the commercialization of its advanced innovative digital vending platform.

BeMotion will invest a total of USD 1.5M as a combination of services and capital equipment into HIT Holdings to fulfill and expand their current contracts.

This investment represents a significant step toward HIT Holdings and BeMotion realizing a shared vision of intelligent digital vending, which provides a solution to last-mile product distribution in the rapidly shifting retail landscape, re-shaping where and how consumers purchase products.

“

We don't sell software, we deliver success”

BeMotion Inc

We are excited to deepen our relationship with BeMotion on their next-generation vending platforms. BeMotion has the most advanced vending technology and the IT expertise necessary to exploit m-commerce and digital marketing capabilities. The platform is dynamic, allowing us to expand this solution into new markets across North

America.” – said Mr. Al Kayed, Director of Business Development of HIT Holdings.

The DCN Vending and Marketplace platform allow users to interact with the vending without

contact through their smartphone. It boasts various features that benefit retailers, such as m-commerce, a product directory, a loyalty program, delivery, digital advertising, and detailed analytics.

"We believe that smart vending is the future of retail. HIT Holding's unique position within Blockchain markets and their strategic distribution relationships within the North American markets made our choice to partner with HIT Holdings very comfortable." – said Mr. AbuHassan, Co-Founder & President of HIT Holdings.

HIT Holdings plans to roll out the systems throughout their existing distribution network, with the initial targets being transit hubs across North America.
