The ISO tank container market consists of sales of tank containers by entities (organizations, sole traders, and partnerships) that are engaged in manufacturing intermodal ISO tank containers for transporting liquid products. The ISO tank container is designed and manufactured as per the guidelines defined by the International Organization of Standardization (ISO). The ISO tank containers are suitable for different modes of transportation and can transport both hazardous and non-hazardous products.

Global ISO Tank Container Market Trends

Usage of the internet of things (IoT) for remote monitoring of ISO tank containers is shaping the ISO tank container market. The IoT is a system of internet-connected objects that can collect and transfer data over a wireless network without human intervention. Many companies operating in the ISO tank container sector are increasingly partnering with companies offering IoT software.
