

Compression Stockings Market is expected to reach USD 2.76 billion, globally registering a CAGR of 5.6% by 2028

As a result of a growing percentage of growth strategy initiatives, this market is expected to increase.

LONDON, UNITED KINGDOM, June 30, 2022 /EINPresswire.com/ -- The global compression stockings market size was valued at 1.78 billion in 2021 and is expected to grow at a CAGR of around 5.6% over the forecast period.

Compression stockings improve blood circulation while also avoiding blood clotting and leg ulcers. The compression stocking industry is growing due to an increase in patients suffering from varicose veins, deep vein thrombosis, as well as Diabetic illness. According to the Centers for

Disease Control and Prevention's 2017 report, diabetes affects over 32.5 million people worldwide. Modern compression stockings are designed to apply precise pressure to the leg while also assisting blood flow back to the heart.
