

E-Cigarette And T-Vapor Market Projected To Reach USD 38.11 Billion By 2028 | Precision Business Insights

The vendors' wide range of customization features, such as temperature control & nicotine dosages, is projected to boost product demand.

LONDON, UNITED KINGDOM, July 1, 2022 /EINPresswire.com/ -- The global [E-cigarette And T-vapor Market Size](#) was valued at USD 18.45 billion in 2021 and is expected to expand at a CAGR of 10.5% over the forecast period. The electronic medium or device that aids in the smoking of tobacco is known as an E-Cigarette. The device includes a battery, an atomizer, and a tobacco storage container. As a result, instead of smoking, the smoker might inhale the "vaping" through this gadget. By pressing a button on the e-cigarette, a heating element atomizes a liquid solution known as e-liquid. Food-grade flavoring, water, vegetable glycerin (VG), propylene glycol (PG), a choice of nicotine levels, and cannabis make up the e-liquid. These e-cigarettes are reusable and have lesser negative health impacts than regular smokes.

Overview of the Global E-cigarette And T-vapor Market Value (USD Million), By Product Type, 2021

E-cigarette And T-vapor Market By Product Type

The E-cigarette And T-vapor Market Regional Analysis

With a market share of approximately 45 percent in 2021, North America led the global market. The presence of key industry participants on social media is regularly exploited to market e-cigarettes and vaping products. Vaping devices have been widely adopted by the youthful population as a safer alternative to tobacco, which is projected to increase product acceptance. However, the current prohibition in the United States on various e-cigarette tastes, notably fruit and mint scents, to prevent underage vaping is projected to hinder industry growth in the region.
