The rural activities market consists of sales of rural activities produced by entities (organizations, sole traders, and partnerships) that undertake rural activities such as forestry, logging, fishing, hunting, trapping, and other forestry services. Timber, finfish, shellfish, and cotton are the main outputs produced through rural activities.

## [Global Rural Activities Market Trends](#)

Drone fishing technology is the new technique that has made fishing easier than the traditional processes. The drone is a flying robot and an unmanned small aircraft with a ground-based controller and system of communication between the two. It is being used for fishing as it can pull single baits out to spots that a person cannot normally reach and move multiple baited hooks to offshore locations. It is highly compatible and portable, requiring only one person to carry all the gear and many remote controls have screens/LCD for better view and fishing photography.

## Global Rural Activities Market Segments
