The artificial turf market consists of sales of artificial turf/grass by entities (organizations, sole traders, and partnerships) that refer to a surface of synthetic fibers made to look like natural grass and replace it. It is used in arenas for sports that are normally played on grass. Artificial turf does not require any kind of practice such as irrigation, trimming, and pesticides, but it requires low-cost maintenance compared to natural grass. It is made from eco-friendly materials and can be used in all kinds of weather. The high durability and all-weather utility of artificial turf make it a popular choice for commercial and residential purposes such as landscaping and lawns.

Global Artificial Turf Market Trends

Technological advancement and continuous innovations are shaping the artificial turf market. This trend is being followed by the companies operating in the turf or grass industry to provide exceptional quality and real value for their customers with standout products including unmatched lifetime warranties, commitment to sustainability and the industry's leading safety ratings.
