

DConnect is again the winner of the Best Blockchain Solution Provider of the year 2022

DConnect has been working hard and focused on building and developing to serve the industry's best.

SINGAPORE, July 6, 2022

[/EINPresswire.com/](https://EINPresswire.com/) -- We are pleased to announce that [DConnect](#) Global Limited is again the winner of the Best [Blockchain](#) Solution Provider of the year 2022, from CC-GLOBAL AWARDS 2021 (Carrier Community).

DConnect is also a finalist in Pacific Telecommunications Council (PTC)'22 Awards. Our team has been working hard to focus on building and developing to serve the industry's best. In 2021, DConnect received two other best awards from CC-GLOBAL AWARDS 2021 (Carrier Community) as the best blockchain solution provider and the best mobility innovative provider.

DConnect transforms the industry with an innovative, revolutionary, and award-winning SDN-enabled network service. We invented the resources pooling model, utilizing DConnect and multiple carriers' backbone resources to develop the DConnect global ecosystem with over 1000 Data Center POPs and public cloud platforms.

DConnect service comes loaded with groundbreaking technology with progressive perspectives:

DConnect Global Limited is again the winner of the Best Blockchain Solution Provider of the year 2022

DConnect Global Limited is again the winner of the Best Blockchain Solution Provider of the year 2022

i) we embedded a unique algorithm that intelligently selects the shortest or cheapest network path;

ii) we develop elastic price management logic and GUI portal to manage pricing for on-net and off-net resources from multiple partners;

iii) we fully embraced open APIs to the extent where partners' network resources and pricing information are automatically updated to DCCconnect portal;

iv) we engaged blockchain technology as inter-carrier SLA governance; DCCconnect changed the competitive landscape and has been able to stand out amongst competitors.

As one of the dominant players in the Hong Kong telco market, there are three out of four major fixed network incumbents in Hong Kong either using DCCconnect SaaS software or an API integrated with DCCconnect.

A renowned carrier with the largest market share in the local and international business established bi-lateral APIs with DCCconnect, enabling the deployment of resources automatically.

A neutral and wholesale-focused carrier in HK is a software licensee of DCCconnect innovative SaaS services, allowing carriers to manage their network with network automation ability.

A full-fledged ICT, DC telecom provider integrated their network in the APAC region with DCCconnect, allowing both companies to offer new innovative services in Layer 2/3, internet, and IPT.

Apart from that, two top-notch DC players from mainland China, with a market cap of over \$2 billion and \$11 billion, also engage with the network automation and orchestration functionalities from DCCconnect as the software licensees.

We aim to provide practical and beneficial technology, which will lead us to make a difference.
