The solvent-based printing inks market consists of sales of solvent-based printing inks and related services used to produce 3D printed objects and banners. Solvent-based inks are pigment inks that are mixed with volatile organic compounds (VOCs) such as hydrocarbons, alcohols, ketones, esters, and others that are waterproof and ultra-violet (UV) safe. They are relatively inexpensive and enable printing on flexible, uncoated vinyl substrates, which are used to produce vehicle graphics, billboards, 3D printed objects, banners, and adhesive decals.

[Global Solvent-Based Printing Inks Market Trends](#)

Solvent-based printing ink companies are introducing thermal inkjet inks to cater to the growing demand. Thermal inkjet printing induces the ejection of the ink droplet by superheating a small portion of solvent-based ink. Advantages of thermal inkjet printing include better performance, lower costs, and ink versatility, especially in photo printing applications.

2022 – Market Size, Trends, And Forecast 2022-2026

[Global Solvent-Based Printing Inks Market Segments](#)

The global solvent-based printing inks market is segmented:

By Type: Cellulose Inks, Epoxy Inks, Vinyl Inks, Vinyl-Acrylic Inks, Polyurethane Inks

By Printing Technology: Lithographic, Gravure, Flexographic, Screen-Printing, Letterpress, Digital, Others

By Application: Label and Packaging, Commercial Printing, Publication, Others

By Geography: The global solvent-based printing inks market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa. Among these regions, Western Europe accounts for the largest share.

Solvent-Based Printing Inks Global Market Report 2022 is one of a series of new reports from The Business Research Company that provides solvent-based printing inks global market overviews, solvent-based printing inks industry analysis and forecasts market size and growth for the global solvent-based printing inks market, solvent-based printing inks global market share, solvent-based printing inks global market segments and geographies, solvent-based printing inks market players, solvent-based printing inks market leading competitor revenues, profiles and market shares. The solvent-based printing inks market report identifies top countries and segments for opportunities and strategies based on market trends and key competitors' approaches.

TBRC's Solvent-Based Printing Inks Global Market Report 2022 includes information on the following:

Data Segmentations: Market Size, Global, By Region and Country, Historic and Forecast, and Growth Rates for 60 Geographies

Key Market Players: Tokyo Printing Ink Mfg. Co. Ltd, Dainichiseika Color & Chemicals Mfg. Co. Ltd, Sun Chemical Corporation, Flint Group, Toyo Ink SC Holdings Co. Ltd., Lawter Inc, Yansefu Inks, Coatings Pvt. Ltd, Siegwirk Druckfarben AG & Co. KGaA, and Sakata INX Corporation.

Regions: Asia-Pacific, China, Western Europe, Eastern Europe, North America, USA, South America, Middle East and Africa.

Countries: Australia, Brazil, China, France, Germany, India, Indonesia, Japan, Russia, South Korea, UK, USA.

And so much more.
