Good hygiene is vital in creating a productive environment that employees want to work in. With

washrooms and equipment being used several times a day by each employee, it becomes critical to maintain hygiene standards in the workplace.

A healthy workforce is happier and more productive. A healthy workplace also means workers take less sick leave. Workplaces represent an environment that could accelerate the spread of the COVID-19 disease, as poor workplace hygiene may contribute to contaminated work areas. Common washing areas and the sharing of food and eating utensils in canteens could contribute to the spread of the disease.

The world is already witnessing the adverse impacts of the COVID-19 pandemic. The WHO has recommended guidelines for the cleaning of communal areas for staff and the public to arrest the spread of the disease. This includes disinfecting areas with bleach solutions. This is anticipated to boost the demand for industrial cleaners in the near future.

Industrial Cleaners Market: Prominent Regions

In terms of value, Asia Pacific dominated the global Industrial cleaners market in 2020. Asia Pacific is projected to account for the major share of the global industrial cleaners market during the forecast period, owing to the rise in the demand for industrial cleaners in applications such as manufacturing, healthcare, foodservice, and automotive. Growth in awareness regarding cleanliness and increase in need of disinfection are expected to drive the demand for disinfectants and other industrial cleaners in various manufacturing industries, especially chemical, food, and textiles.

The increase in the number of infectious and communicable diseases has led to a need for disinfection and other industrial cleaners in various industries. Furthermore, rise in government initiatives in countries such as India and China regarding disinfection and cleanliness is expected to boost the industrial cleaners market.

North America is a one of the key regions of the global industrial cleaners market. The U.S. held large share of the industrial cleaners market in North America in 2020. The growth of the market in the country can be ascribed to the expansion of oil & gas, automobile, metallurgy, and food processing industries. Increase in hospital construction activities and high awareness about the importance of a hygienic environment in the U.S. and Canada are some of the factors driving the industrial cleaners market in these countries. Manufacturing has been a core aspect of the U.S. economy since the late 1700s. The outlook for manufacturing appears strong. After a disruptive 2020, employers are anticipating a return to relative normalcy and growth in the manufacturing sector in the U.S. This is anticipated to drive the industrial cleaners market in the country.
