

Mailing List Website has extensive databases of CBD buyers for pain throughout the United States of America

CBD has already been medically proven to be an effective pain manager, making CBD buyers for pain a crucial marketing opportunity.

LAS VEGAS, NEVADA, UNITED STATES, August 11, 2022 /EINPresswire.com/ -- [Sprint Data Solutions Worldwide Marketing](#) is a marketing firm focused on helping companies and charities to increase their outreach potential. Those organizations focused on transactions with other companies will want to use the many business postal mailing lists available. These lists have important contact data like the relevant decision-makers and their corporate titles.

However, some other products and services are aimed more at the general public. For these businesses and charities, consumer postal mailing lists are better suited. The databases can be broken down according to different metrics, including geographic and demographic classifications. Sprint Data Solutions Worldwide Marketing is ready to help with both B2B and retail consumer marketing and promotion plans.

Sprint Data Solutions Worldwide Marketing's Origin

Sprint Data Solutions Worldwide Marketing was an idea that came from its founder, a disabled veteran. After completing the duties of military service, the next step was to move away from defense and try something else. Growth, specifically of the economy, would be the new direction, and that economic growth would come

from helping businesses find more clients or customers, which is essential to healthy development. A start-up began, and today, that humble beginning has grown to include staff with over 50 years of combined industry experience in the marketing sector.

Sprint Data Solutions Worldwide Marketing first entered the industry during a period of transition. Traditional marketing strategies on older platforms like television and radio were still in play, but digital marketing was already asserting itself as a new contender. The company's point of entry was direct mail marketing, which ended up imparting valuable skills in data acquisition, management, and analytics. Then digital was quickly recognized as a new mover and shaker. Sprint Data Solutions Worldwide Marketing's skillset gave it an early mover advantage. It offered digital marketing services and enjoyed significant gains for itself and its clients.

Since then, Sprint Data Solutions Worldwide Marketing has moved well past its initial range of only the hometown of Las Vegas, Nevada. The rest of the USA is now covered, including Alaska and Hawaii. There is also a complete North American service, with databases for the markets in Canada and Mexico. And for groups ready to go international it's possible to cross the Atlantic and use databases for European Union markets like France.

More Alternatives For Pain Management

America is only now coming to understand and embrace the benefits of cannabidiol, or CBD, a

substance found in marijuana that is responsible for the stress and pain relief qualities of marijuana, not the psychedelic effects. In many ways, CBD is a safer, more effective application for pain and stress management since it comes with none of the side effects of conventional prescription medication. Thankfully, the legalization of marijuana is now making CBD more accessible.

This creates a new demographic of people interested in pain reduction. CBD is an excellent anti-inflammatory, which means that it even provides relief for arthritic discomfort and even digestive conditions, greatly broadening the base of users. As the usage of CBD spreads around the various states, it creates a new awareness and desire for similar products and services.

Finding CBD Users

[CBD users come from various walks of life and have many different needs.](#) While some may only take CBD for occasional discomfort, others may regularly consume it for a chronic condition. Some users even regularly purchase and use CBD, not for themselves but for their pets, as CBD has already proven to be effective at treating the same conditions in cats and dogs.

This creates new opportunities for businesses to offer related products and services. People taking CBD for arthritis, for example, may be more receptive to other forms of assistance or pain management to help get through the day, while people with digestive conditions will be open to other alternative products or services.

Reaching CBD Users

Sprint Data Solutions Worldwide Marketing has lists for CBD buyers for pain all over America. The databases allow for nationwide campaigns but can also be scaled down for smaller efforts. The New England states, for example, can be specifically targeted for a regional marketing effort. Single states can also be focused on, such as if there's a wish to approach only CBD buyers in New Jersey. It's even feasible to target only a specific neighborhood, in a single town or city, such as only CBD buyers in Manhattan, New York.

Databases can also be categorized and provided for based on demographic needs. CBD buyers can be targeted by ethnicity, such as approaching only African Americans. Buyers can also be targeted religious groupings, so only Muslims can be marketed to if that's an appropriate market. Financial classifications are also available if a marketing strategy seeks only high-net-worth individuals.

Contact details are available in different formats. Physical mailing addresses are provided for direct mail, while digital marketing gets email addresses. Telephone numbers for residences and businesses are available for telemarketing. Cell phone numbers can be delivered even for text/SMS-based marketing strategies.

Some clients with an interest in managing a direct mail campaign hesitate due to a lack of experience. Turnkey direct mail solutions are available to address this concern. This service

guides clients through all phases of the direct mail campaign process. It begins with concept and planning, creating and printing materials, and finally distribution with the desired databases. Everything happens under one roof, bypassing the usual need to source for and vet service providers for the different stages of the process.

[If you want to reach out to CBD buyers for pain in the USA](#), contact Sprint Data Solutions Worldwide Marketing. You support an American company owned and operated by a disabled veteran when you work with us.
