The food preservatives market consists of sales of food preservative products by entities (organization, partnership, sole traders) that are used to preserve food from any kind of spoilage and bacterial impact. Food preservatives are chemicals or natural ingredients including salt, vinegar, sugar, sorbates, nitrites, and others that are added to the food to prevent decomposition of microbial growth. Food preservatives can be toxic and non-toxic depending on the degree of toxicity they exert on food and are used in different food processing levels.

## [Global Food Preservatives Market Trends](#)

The growing use of natural preservatives is an emerging trend in the food preservatives market. According to the food preservatives market research, consumers are increasingly becoming concerned about the negative impact of preservatives and preferring natural alternatives including organic acids, salt, sugar, and others. Major companies operating in the food preservatives sector are shifting their focus towards natural preservatives solutions to offer a range of clean label preservation to strengthen their position. For instance, in 2021, Kerry Group, an Ireland-based food company expanded its range of clean label preservative solutions to replace traditional sodium nitrite salts to provide safer consumer-friendly preservatives for
