COVID-19 Analysis

When the COVID-19 pandemic broke out, the burden of incidence and death exponentially grew, causing significant disruptions in the social, economical, and other facets of life. Although in the most industrialized nations with top-notch healthcare systems, the health industry and associated infrastructure bore the most of the cost. The recent introduction of some important medications and their rising sales, however, have prevented the COVID-19 pandemic from having a significant impact on the market for psoriasis medications.

The Psoriasis Drugs Market Regional Analysis

Due to the region's advanced healthcare system, North America currently controls the majority of the global market for psoriasis treatments. As a result of the region's huge population, Asia-Pacific is predicted to experience rapid expansion from 2022 through 2029.
