"As we drive our mission of creating a safer, more reliable world, we are excited to offer the next generation of our leading-edge [ViewPoint](#) technology," said SEAM Group's Chief Technology

Officer, Igor Bondarenko. "ViewPoint serves as a single pane of glass for our customers, giving them a clear line of sight into their most critical safety and reliability insights for all of their energized assets."

“

As we drive our mission of creating a safer, more reliable world, we are excited to offer the next generation of our leading-edge ViewPoint technology”

Igor Bondarenko

ViewPoint is trusted by customers across multiple industries, including life sciences, distribution, logistics, hospitality, manufacturing, electric vehicle charging, data centers, food service, building management, and more. Since being implemented as a value-add for SEAM Group

customers over a decade ago, ViewPoint has been utilized by more than 7,000 registered users and generated more than \$1 billion in downtime cost savings.*

Customers use ViewPoint as a multi-discipline product combining and analyzing data gathered from infrared, vibration, oil, ultrasound and motor current testing, as well as safety services like

arc flash hazards analysis and digital lockout/tagout programs. ViewPoint supports access to actionable insights and analytics across all facilities for multiple users.

“ViewPoint is simple to integrate and highly scalable, giving its adopters a powerful way to improve their safety, reliability and performance of all their energized assets,” Bondarenko said. “In

building out the functionality for ViewPoint 2.0, we listened to our customers with empathy and put extensive research into this offering – we are excited to get it into their hands.”

*Based on customer reported downtime cost
