The chemicals market consists of the sales of chemicals by entities (organizations, sole traders, and partnerships) that produce chemicals based on the transformation of organic and inorganic raw materials by a chemical process and the formulation of products (but excluding beneficiating of mining output, refining of crude petroleum, manufacturing of aluminum oxide, primary metal manufacturing, beverage distilling, tobacco manufacturing). The chemicals industry establishments produce a variety of chemical products by processing raw materials such as air, water, natural gas, oil, metals, and minerals.

Global Chemicals Market Trends

Chemical companies are increasingly adopting sustainable and eco-friendly processes to eliminate the negative impact of chemical manufacturing on the environment which is a key trend shaping the chemicals industry outlook. Evolution in technology and chemical sciences enabled chemical companies to utilize alternative fuels to produce chemical products. They are using naturally available carbon dioxide to produce fuels, industrial products, and other substances. For instance, Akzo Nobel N.V a chemicals and coatings giant is planning to make a seven-figure investment into Green Lizard Technologies' patented process to make surfactants from plants rather than from oils.
