For decades, thousands of people across the world have used NLP to overcome obstacles and achieve success. Michael Beale works internationally with professional people of all ages, helping them learn how to become more effective at what they do - both at work and in their personal lives. As well as coaching people to greater success and fulfilment, Michael runs 1:1 NLP training courses and now, for the first time, he has opened up his students' study resources to everyone, free of charge.

Global and local 1:1 NLP training courses. NLP is a powerful tool that can help you achieve success in your personal and business life. Certified training programmes

run for 6 months and are normally based on 1-hour a week, plus reading and exercises. Additional sessions can be booked to rehearse real life challenges and opportunities. This time frame works exceptionally well for ambitious professionals because they have enough time to

clarify what will make the programme useful to them and also to test out approaches in their environment, developing them to achieve real results. It also gives them enough time to establish powerful habits that will serve them into the future, well after the programme has been completed.

Courses offered include:

[NLP Practitioner](#). Unique 1:1 Practitioner training makes it possible for clients to achieve or exceed aspirations, and at the same time develop a very high level of competence in NLP.

[NLP Business Practitioner](#). For people who want to improve their lives as well as their careers or businesses.

[NLP Coach Practitioner](#) for people who want to master coaching. This programme is for NLP Master Practitioners and offers full SNLP Coach Practitioner certification. Certificates are signed by NLP co-founder Richard Bandler, John La Valle, and Michael Beale.

Each programme is split into 4 sections:

1. Free discovery, so that potential delegates can determine the value of the programme for themselves.
2. Theme content area specific to the programme.
3. Voluntary project to develop skills in a specific environment.
4. Integration, so that delegates can apply what they've learned in their business and personal lives.

The free discovery phase consists of 3 sessions and is available to anyone who is genuinely interested in the programme and has access to an appropriate budget. There is no commitment to continue further if the time is not right. To excel in the programme people need a touch of ambition, courage, discipline and honesty. They also need to commit a minimum amount of time and energy, so the discovery phase helps them really work out what will make the programme useful for them.
