

CRI Advantage Announces Partnership with Rival Data Security

The Boise-based IT firm partners with cybersecurity software firm to provide robust software for businesses of all sizes across all industries.

BOISE, IDAHO, UNITED STATES, July 11, 2022 /EINPresswire.com/ -- [CRI Advantage \(CRI\)](#), a ServiceNow partner and longtime provider of information technology services and solutions to the federal government, is evolving its cybersecurity practice to provide businesses of all sizes the opportunity to manage their cybersecurity program on one robust platform.

CRI will expand its cybersecurity offerings through its partnership with [Rival Data Security \(Rival\)](#). Rival, a pioneer of the Security Management Orchestration (SMO) space, developed its software to fill the gap in holistically managing the many aspects of a comprehensive cybersecurity program. The Rival SMO software is unique in that the modules are interconnected and able to communicate with one another. The software is intuitive and easy to navigate and provides a solution to the outdated, traditional ways of tracking and analyzing IT risk and compliance.

“

This partnership will be a game-changer for businesses, allowing them to manage their cybersecurity program all in one place, access KPIs effortlessly, and respond quickly when an incident occurs.”

Monte Brookshier

Rival created the original platform specifically for financial institutions. CRI will adapt the platform to become the [CyberAdvantage Management Platform \(CMP\)](#) for use in businesses of all industries. The CMP will help businesses manage seven different areas of their cybersecurity

program all in one place. Those areas include user training, program, compliance, security testing, vendor cybersecurity, incident response, and risk management.

CRI’s CEO, Monte Brookshier, said, “For more than 30 years, we have provided cybersecurity

expertise and tools to protect organizations of all sizes against cyber threats. In today's digital environment, it is more important than ever that all companies have a strong cybersecurity program in place. Rival's tool is simple to use and provides continual strategic value. It's basically a roadmap to attain cybersecurity maturity. We believe this partnership will be a game-changer for businesses, allowing them the opportunity to manage their cybersecurity program all in one place, access KPIs effortlessly, and respond quickly and efficiently when an incident occurs."

Randy Lindberg, Founder and CEO of Rival Data Security, said, "We are proud to have leaders like CRI in the [cyber] space. Together, we are providing businesses of all industries the chance to stay ahead of attacks on one robust platform."

About CRI Advantage:
