

Avere Beauty Offers IPL Laser Treatments at its Med Spas in Pittsburgh

An industry leader in anti-aging treatments and beauty services in Pittsburgh is offering Intense Pulsed Light Laser at its med spas.

PITTSBURGH, PENNSYLVANIA, UNITED STATES, July 13, 2022 /EINPresswire.com/ -- Representatives with [Avere Beauty](#) today announced that it offers Intense Pulsed Light Laser (IPL) treatments at its Med Spas in Pittsburgh.

"We're excited to offer [IPL laser treatments](#)," said Avere Beauty Business Director Frank Udavcak.

Udavcak explained that IPL laser treatments can treat age and sun spots, freckles, hyperpigmentation, broken capillaries, birthmarks, port wine stains, and more.

IPL laser treatments, according to Udavcak, use a handpiece to deliver a series of gentle pulses of intense pulsed light to the skin. The IPL penetrates the dermis, which is absorbed by the pigment and vascular irregularities in the skin's deeper tissue.

The treatment may last 15 – 30 minutes, depending on the size of the area treated. The sensation is similar to a snap of a rubber band on the skin. The treatment is virtually painless for most individuals, and a topical anesthetic cream may be applied to minimize any discomfort. Avere Beauty also uses Ultrasound Jelly to provide extra protection.

Udavcak went on to reveal that Avere Beauty uses a brand new laser with the latest technology.

"Our IPL laser or photo facial can improve the color and texture of your skin without surgery," Udavcak said.

For best results, it's recommended that patients receive four to six treatments approximately

four weeks apart.

As for what it feels like, the feeling of an IPL photo facial, Udavcak said, has been compared to a rubber band snapping on your skin.

"While everyone's pain tolerance is different, we do offer topical Lidocaine and Ultrasound Jelly to absorb some of the heat and allow gliding," Udavcak said. "Avere Beauty tries to give you the most comfortable experience possible."
