The stucco market consists of sales of stucco by entities (organizations, sole traders, and partnerships) that is used as a decorative coating for walls and ceilings, as well as exterior walls. It is a building material composed of aggregates, a binder, and water. Stucco is applied in a liquid state and solidifies to a solid once dry. It is tough, long lasting, and fireproof. It is utilized in architecture as a decorative coating for walls and ceilings, as external walls, and as a sculptural and aesthetic material.

[Global Stucco Market Trends](#)

The use of mortar spraying machines is one of the key stucco industry trends gaining popularity. Major companies are focused on developing new technological solutions such as stucco spraying machines to strengthen their position, which is predicted to be shaping the stucco market outlook. For instance, in 2020, Hunan Gaohua New Materials Technology Co. Ltd., a China-based company that manufactures construction equipment and stucco sprayers, launched its new product, stucco tool mortar cement plastering machine model GH. It is a lightweight machine with a high spraying capacity. The company launched this machine with four modes with a production capacity of 10,000/year. By using this, an even coat of stucco can be applied all over the walls, and can easily do the stuccowork in less time and with a smaller workforce.
