The autonomous last-mile delivery market consists of sales of autonomous last-mile delivery solutions by entities (organizations, sole traders, and partnerships) that refer to the last phase of the delivery process when cargo is carried from a transportation hub to its final destination usually through drones or autonomous vehicles. Autonomous last-mile delivery solutions are used by various retailers and logistics companies for heavy, medium, or lightweight cargo to minimize the delivery time and supply-chain costs.

[Global Autonomous Last Mile Delivery Market Trends](#)

Technological advancements are shaping the autonomous last-mile delivery market. Companies manufacturing autonomous last-mile delivery solutions are investing in advanced technology to provide enhanced products and services to customers.
