The gesture recognition market consists of sales of gesture recognition technologies by entities (organizations, sole traders, and partnerships) that refer to a type of perceptual computing user interface that enables computers to recognize and understand human gestures as orders. Gesture recognition entails tracking a human position, orientation, or movement and then interpreting it to distinguish semantically significant gestures. It is utilized for Human-Computer Connection (HCI), a type of human-machine interaction that uses just physical actions rather than voice.

[Global Gesture Recognition Market Trends](#)

Technological advancement is a key trend gaining popularity in the gesture recognition market. Major companies operating in the gesture recognition market are focused on developing new technological solutions to meet consumer demand and strengthen their position.

[Global Gesture Recognition Market Segments](#)

By Type: Online Gesture, Offline Gesture

By Technology: Touch-Based, Touchless

By Authentication Type: Finger Print Recognition, Face Recognition, Vision and IRIS Recognition, Hand and Leg Recognition
