Ophthalmology is a branch of medical science that deals with the structure, function, and various eye diseases. It is used to identify ocular defects or deficiencies and treat eye disorders. Ophthalmic devices are medical equipment designed for diagnosis, surgery, and vision correction. Whereas, the ophthalmic diagnostic devices are gaining increased importance and adoption due to surge in prevalence of various ophthalmic diseases such as glaucoma, cataract, and other vision-related issues in the emerging countries.

The virus that causes COVID-19 is from the family of viruses called Coronaviridae. This is caused by a contagious RNA virus termed as severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2). The pandemic has impacted the ophthalmology screenings due to lockdown. The ophthalmology surgeries and diagnostic screenings are postponed due to COVID-19 and are done through teleophthalmology services such as an app, phone calls, emails, and messages.
