

OATI Webinar Demonstrates Industry's Premier CTRM Solution

webCTRM™ provides unified, cross-commodity trading and risk management capabilities

MINNEAPOLIS, MINNESOTA, USA, July 14, 2022 /EINPresswire.com/ -- Open Access Technology International, Inc., hosted a webinar on Tuesday, July 12, that featured [webCTRM™](#), the energy industry's premier Commodity Trading and Risk Management (CTRM) system. Both current and prospective OATI customers were able to participate in a demonstration to see how the webCTRM solution works, learn its key features and ask questions.

Open Access Technology International, Inc.

The webinar explained the unique capabilities of webCTRM and how it controls all facets of a trade, including Positions, P&L, Risk Management and Settlements. This multi-commodity system streamlines trading of all commodities, including Power, Gas, RECs, Oil, Coal, and even Non-energy Commodities.

“

Overall, it provides you unified, cross-commodity trading and risk management capabilities that you can be confident are truly market based.”

Salah Khuhro, OATI VP of Sales

“The key is that webCTRM handles the entire trading lifecycle of any commodity,” says Salah Khuhro, OATI VP of Sales. “Whatever the commodity, our groundbreaking webCTRM solution speeds up, simplifies and secures every aspect of the trade including trade execution, risk management, settlements and post-trade analysis.”

OATI webCTRM works seamlessly with the company's other premier solutions, such as OATI [webTrader™](#) and can also be used with third-party integrators. “When used in conjunction with OATI webTrader, there is no need for

third-party integration,” says Khuhro. “Whether you are trading energy or any other commodity,

webCTRM captures and executes trades, analyzes realized or unrealized P&L, monitors bi-directional credit risks, provides checks and balances, provides insights into what contributed to increased or decreased trade values, and can programmatically create and distribute invoices and reports.”

The OATI webCTRM includes a comprehensive market and credit risk solution for assessing, hedging, and modeling risk. “OATI webCTRM combines deal capture, processing, and management that optimize trading strategies based on actual market quotes, rather than historical data,” notes Khuhro. “Overall, it provides you unified, cross-commodity trading and risk management capabilities that you can be confident are truly market based.”
