

The Kubuntu Focus Team Announces Kubuntu Focus Suite 22.04 LTS

The Kubuntu Focus Team announces the general availability of the Kubuntu Focus Suite (KFS) 22.04 LTS for all existing Focus systems.

SAN FRANCISCO, USA, July 14, 2022 /EINPresswire.com/ -- The Kubuntu Focus Team announces the general availability of the Kubuntu Focus Suite (KFS) 22.04 LTS for all existing Focus systems. This Suite includes Kubuntu 22.04 LTS, KDE 5.24 LTS, and Focus tools, configurations, and optimizations for Focus hardware. Check out the "[Curated Apps](#)" video to see how to install and launch apps while staying focused.

We've worked since late 2021 to migrate to Kubuntu 22.04 and tested all existing models to ensure the hardware and software function as desired. Validated models include the Kubuntu Focus M1, M2 GEN 1 through M2 GEN 4, and the XE GEN 1. We test kernel and driver updates on all models to help ensure they continue to work as expected.

When you are ready to upgrade your Focus system, or if you just want to try KFS on your own VM, please use the [clean install guide](#). Remember to back up your data first! Here are just a few of the many improvements found in KFS 22.04 LTS:

- KDE upgraded from 5.18 to 5.24 LTS

**KUBUNTU
FOCUS**

- Disk decrypt dialog looks better and is easier to read
- Sleep and resume work more reliably with USB devices
- Multi-monitor sign-in screens no longer overlap
- Improved hardware optimizations across all models
- Expanded first-run wizard
- Updated system tray GPU widget
- Enhanced power subsystem for Alder Lake

About Kubuntu Focus

Kubuntu Focus takes the guesswork out of system configuration and administration, empowering developers and companies to focus on innovation. Eliminate days or weeks of setup with:

- Carefully selected and tested high-performance systems and components
- Preconfigured and Curated Apps
- Hundreds of UX and hardware optimizations
- Unique and useful Kubuntu Focus Tools
- Frequent improvements through regular package updates
- Unmatched Linux-first support

Write once and deploy with industry-standard Ubuntu® 22.04 LTS and the beautiful KDE Plasma desktop. Learn more at <https://kfocus.org>.
