

Fourier Intelligence Inks MoU with National Robotarium to Advance Rehabilitation Technology

The growth of global rehabilitation robotics sector takes a significant step with a new partnership between Fourier Intelligence and the National Robotarium.

EDINBURGH, UNITED KINGDOM, July 15, 2022 /EINPresswire.com/ -- A Memorandum of Understanding has been agreed which will promote knowledge sharing and joint work to create world-leading robotics to benefit the lives of people around the world.

Fourier Intelligence is committed to building the sector and its potential through collaboration with experts around the world and is forming key partnerships with academic and clinical sites on a global scale from its bases in Singapore and Shanghai.

Its MoU with the National Robotarium is the first partnership of its kind in the UK and is seen as having huge potential.

The National Robotarium, in Edinburgh, Scotland, is known as a world-leading centre for the advancement of robotics and in creating innovative technology-led solutions to global challenges, taking research from the laboratory to market.

The partnership between two globally significant names in rehab robotics is the latest step in helping to drive forward the fast-growing sector and to create new solutions in rehabilitation to benefit the lives of those who need them.

"We believe collaboration lies at the heart of unlocking the full potential of this sector," says Zen Koh, Co-Founder and Deputy Group CEO of Fourier Intelligence.

"This partnership with the National Robotarium is another very significant step in achieving this on a global scale. With the expertise they have here, and their experience in bringing research to
