

Sugar-Free Ice Cream Market to reach \$7,355.0 million by 2030, growing at a CAGR of 9.6%

*Rise in prevalence of diabetes, obesity encouraging individuals opt healthy food
Manufacturers continuously trying to figure out healthier substitute for sugar*

PORTLAND, OR, UNITED STATES, July 15, 2022 /EINPresswire.com/ -- The global [sugar-free ice cream market](#) size is expected to reach \$7,355.0 million by 2030 at a CAGR of 9.6% from 2021 to 2030.

Sugar-free ice cream is a special type of ice cream made by substituting sugar

with sugar alcohol. Sugar alcohols are compounds derived from sugar, which resemble sugar in terms of both taste and appearance but contains fewer calories. Xylitol, erythritol, sorbitol, and maltitol are few popular sugar alcohols that may be used to make sugar-free ice cream.

People perceive sugar-free ice cream as a healthier alternative to regular ice creams, due to fewer calories and fewer negative health effects. This is a key factor propelling the growth of the sugar-free ice cream market globally. Moreover, increase in prevalence of diabetes, obesity, and heart disease is boosting the demand for sugar-free ice cream. Around 1.5 million deaths were recorded across the globe that were directly associated with diabetes. Therefore, increase in health consciousness, rise in trend of living an active & healthy lifestyle, and surge in demand for healthy food coupled with high disposable income act as the key driving forces of the global sugar-free ice cream market.

In addition, increase in popularity of sugar-free ice cream among the diabetic & health-conscious people notably contributes toward the sugar-free ice cream market growth. This is attributed to the fact that sugar-free ice cream is a rich source of vitamins A, B-6, B-12, C, D, and E. Moreover, it is a rich source of minerals like calcium and phosphorous. Consuming ice cream provides

energy and stimulates brain. Therefore, these nutritional and health benefits are anticipated to contribute significantly to the growing demand for the sugar-free ice cream globally.

According to the sugar-free ice cream market trends, the availability of wide range of flavors in the market is attracting a large consumer base and help serve the customers based on their taste and preferences. According to the International Dairy Foods Association (IDFA), chocolate, vanilla, strawberry, and mint chip are the most preferred sugar-free ice cream flavors across the globe, due to their deliciousness and ability to enhance the taste of other treats and desserts.

However, the sugar-free ice cream industry was negatively impacted due to the COVID-19 pandemic. The rumors and misconceptions further ruined the demand for the sugar-free ice creams in the market, for instance, consuming ice cream can make an individual susceptible to COVID-19 virus, as one can catch cold. Furthermore, rise in prices of inputs such as packaging materials and freight reduced the profitability during the pandemic. Moreover, closure of production facilities, disruptions in the supply chain, and rise in unemployment rates during the pandemic adversely affected the sugar-free ice cream market.
