

Compression Wear and Shapewear Market Valuation Worth USD 6.95 Billion by 2030, Growing At a CAGR of 7.7% From 2021–2030

Global Compression Wear and Shapewear Market by Product Type, Gender, Application and Distribution Channel: Opportunity Analysis & Industry Forecast, 2021–2030

PORTLAND, OREGON, UNITED STATES, July 15, 2022 /EINPresswire.com/ -- According to a new report, "Compression Wear and Shapewear Market" The report offers an extensive analysis of key growth strategies, drivers, opportunities, key segment, Porter's Five Forces analysis, and

competitive landscape. The <u>compression wear and shapewear market size</u> was valued at \$4 billion in 2020, and is projected reach \$6.9 billion by 2030, registering a CAGR of 7.7% from 2021

to 2030.

However, the industry is facing significant challenges due to the growth in awareness of probable side effects of compression & shapewear."

Roshan Deshmukh

Compression wear & shapewear are tight-fitted apparels designed specifically to keep the body in a certain posture. Increase in disposable income of customers, advancements in the fabric technology & garment designs, rise in popularity of shapewear among the geriatric population, and change in lifestyles drive the market growth of shapewear segment.

The male users segment leads the global compression wear & shapewear market, owing to higher adoption of

compression wear. Moreover, majority of men also prefer compression garments during a workout, further fueling the demand from the male consumer segment. The female consumer segment is expected to grow at a highest growth rate over the anticipated period, owing to rise in female interest for fitness and comfortable clothing and increase in participation of women in

sports activities. Furthermore, companies such as Nike, UnderArmour, and others have started to target the women segment with the launch of new product lines and establishment of women-specific stores.

Among various distribution channels, the specialty retail stores segment held the highest revenue share of 62%, and is expected to maintain its dominance ahead as well. This segment constitutes company-owned outlets that possess extensive penetration in various geographies and sell wide product lines of compression wear and shapewear. However, the compression wear & shapewear market growth is expected through online sales channels with a high CAGR of 8.6%, owing to wide product availability on e-commerce websites and rise in Internet penetration in Asia-Pacific and LAMEA.

Application wise, the performance & recovery segment accounted for the maximum revenue share of \$2.96 billion in 2020. This segment is expected to grow at the highest CAGR of 6.2% during the forecast period, owing to extensive usage of compression wear to prevent injuries, improve blood circulation, and speed up recovery.

The compression wear segment dominated the overall market in 2020, accounting for over 70% of the revenue, due to the widespread usage of various types of compression wear by professional athletes and lifestyle users practicing recreational exercises. Growth of this segment is driven by the vast health benefits offered by these garments, such as improved performance, body temperature maintenance, reduced muscle fatigue, and prevention of injury. A significant rise in number of lifestyle users in developing regions and rise in trend of using compression wear as an athleisure wear are expected to increase the demand for compression wear.

Some of the key players operating in the global compression wear & shapewear market such as Nike Inc., Spanx Inc., Adidas AG, Triumph International Corporation, Leonisa SA, Wacoal America Inc., Ann Chery, 2XU Pty Ltd., Under Armour Inc., and Jockey.
