

Talcum Powder Compensation Center Is Urging a Woman with Mesothelioma Who Was a Lifelong User of Talcum Powder-Baby Powder To Call The Legal Team at Danziger & De Llano About Compensation That Might Be Millions

WASHINGTON , DC, USA, August 19, 2022 /EINPresswire.com/ -- The Talcum Powder Compensation Center says, "We are urging the family of a woman who was a lifelong user of talcum powder-baby powder and who has recently been diagnosed with mesothelioma to please call the remarkable legal team at the law firm of Danziger & De Llano anytime at 800-864-4000 to discuss financial compensation. Financial compensation for a person like this might be in the millions of dollars. Our initiative is focused on talcum powder-baby powder who have developed mesothelioma anywhere in the USA.

Talcum Powder

"Most people who used talcum powder-baby powder are stunned to learn they have mesothelioma. What most users of baby powder-talcum powder do not realize is every time they sprayed themselves with this product-they were exposing themselves to asbestos.

"If your wife, mom or daughter was a lifelong user of talcum powder-baby powder and they have

just been diagnosed with mesothelioma anywhere in the USA please call the remarkable legal team at the law firm of Danziger & De Llano anytime at 80-864-4000. Danziger & De Llano is a national mesothelioma law firm, they have been assisting people with this rare cancer for 25 years-and they produce significant compensation for their clients-including people with mesothelioma who used talcum powder-baby powder." <https://meso.dandell.com>

“

If your wife, mom or daughter was a lifelong user of talcum powder-baby powder and they have mesothelioma anywhere in the USA please call the law firm of Danziger & De Llano anytime at 80-864-4000.”

*Talcum Powder Compensation
Center*

*\$6,350,000 Compensation Result received by a gentleman diagnosed with mesothelioma at the age of 52. He was exposed to asbestos while spending four summers working for a local ceramics company. He was exposed to asbestos-contaminated talc while making slip, a clay-like material.

*\$5,565,000 Compensation Result received by a 71-year-old woman who was diagnosed with mesothelioma following her use of baby powder.

*\$2,025,450 Compensation Result received by a 43-year-old woman diagnosed with peritoneal mesothelioma who

had exposure to asbestos from her repeated use of talcum powder products.

*\$2,250,000 Compensation Result received by a 35-year-old peritoneal mesothelioma man who was exposed to talc products as a baby when his mother used baby powder to diaper him and his brother.

*\$1,625,000 Compensation Result received by a 64-year-old woman who was diagnosed with mesothelioma and whose only known exposure to asbestos was from using talc products on

herself and when diapering her children.

Who are the types of people who may have used talcum powder or baby powder and developed mesothelioma?

1. Women who started using Johnson & Johnson's Baby Powder as a young girl, teenager or as a young woman and who continued to use this product for years or even decades.
2. Men who started using this product as a boy, teenager or young man and continued to use this product for years or decades.
3. Men or women who were amateur or professional athletes who used baby powder to control perspiration or to get a better grip on a football, baseball, basketball, softball, tennis racket or golf club.

The typical age for a person with mesothelioma in the United States is about 72 years old. Men or women who have used talcum powder for years and who have now been diagnosed with mesothelioma may be significantly younger. <https://meso.dandell.com>
