Digital technologies have risen to prominence as a critical determinant of economic growth, national security, and international competitiveness. The digital economy has a profound influence on the world's trajectory and the societal well-being of ordinary citizens. It affects everything from resource allocation to income distribution and growth. Global statistical accounting challenges notwithstanding, tracking the digital economy's growth trajectory is essential because it serves as an integral forward-looking barometer of the economic growth and international competitiveness. Conceptually, the digital economy comprises goods and services that either were produced using digital technologies or include these technologies. The information and communications technology (ICT) industry stands at the center of much of this activity, underpinning the digital economy and serving as a reliable yardstick.

In the digital era, innovation, entrepreneurial dynamism, and information and ICT production will drive global competitive edge. The ICT industry and ICT-enabled industries make important contributions to economic growth. This paper attempts to value those contributions and benchmark the importance of the ICT sector in the U.S. economy by assessing its contributions to economic growth, job creation. The sector's downstream contributions to the small business ecosystem and investments in reskilling and upskilling initiatives are examined. Finally, systemic challenges related to data privacy, trade, and immigration facing the sector are reviewed.

The global digital transformation market is expected to garner absolute dollar growth of US\$ 1.7 Trillion until 2032. The industry is expected to exhibit a growth rate of 23.6% from 2015 to 2021. In the forecast period, the Internet of Things segment, by technology, is expected to lead the market, exhibiting a CAGR of 13.8% during the forecast period from 2022-2032. Regionally, North America is likely to dominate the industry, with the U.S making the most significant contribution, garnering US\$ 811.7 Billion by 2032. On the other hand, APAC is projected to be the fastest-growing region with China procuring US\$ 134 Billion by 2032.

Competitive Landscape:

Organizations in the global digital transformation market are taking various initiatives to digitally transform their business. As the competition is rising, players are collaborating, partnering, and launching new products to gain a competitive edge. Some of the recent developments in the industry are as follows:

In October 2021, Siemens Smart Infrastructure acquired Wattsense, French hardware, and software firm that offers IoT management systems for small mid-sized buildings, bringing Siemens' building product line to a new stage.

In August 2021, Kubota Corporation announced a strategic partnership with Accenture to enhance its digital transformation by transforming its business model to contribute to food, environmental, and water solutions. The partnership is likely to offer a platform for Kubota locally and globally by incorporating services that combine the digital technologies of Accenture, comprising AI and the IoT.

Key Segments Covered in the Global Digital Transformation Market Study

Digital Transformation Market by Technology

Digital Transformation for Cloud Computing

Digital Transformation for Big Data and Analytics

Digital Transformation for Mobility/ Social Media

Digital Transformation for Cybersecurity

Digital Transformation for Artificial Intelligence

Digital Transformation for Internet of Things

Others

Digital Transformation Market by Deployment

Digital Transformation for Cloud

Digital Transformation for On-premises

Digital Transformation Market by Organization Size

Digital Transformation for SMEs

Digital Transformation for Large Enterprises

Digital Transformation Market by Vertical

Digital Transformation for BFSI

Digital Transformation for Retail and E-Commerce

Digital Transformation for IT and Telecom

Digital Transformation for Media and Entertainment

Digital Transformation for Manufacturing

Digital Transformation for Healthcare and Life Sciences

Digital Transformation for Education

Digital Transformation for Government and Defense

Others

Digital Transformation Market by Region

North America Digital Transformation

Europe Digital Transformation

APAC Digital Transformation

Latin America Digital Transformation
