The increasing demand for consumer electronics like PCs owing to the inflating income levels of consumers and the rising penetration of the internet is among the key factors augmenting the growth of the global laptop market. Besides this, the emerging trend of bring your own device (BYOD) to the workplace is acting as a significant growth-inducing factor. Moreover, the widespread adoption of remote and hybrid working models is positively influencing the market. Additionally, the easy availability of low-cost laptops is also propelling the market growth. Furthermore, the introduction of advanced models with innovative features and customizable designs through online retail channels at discounted prices and innumerable payment choices is anticipated to create a favorable outlook for the global laptop market in the coming years.

The project report on laptop covers the following aspects:

Market Snapshot (Market Performance, Segments, Regional Insights, Covid-19 Impact and outlook)

Manufacturing Process:
