Market Dynamics:

Major factors providing impetus to the global mechanical keyboard market revenue growth are increasing personal and professional applications of mechanical keyboards, technological advancements in mechanical keyboards, and increasing demand for mechanical keyboards due to several advantages over traditional membrane keyboards, such as accurate typing, extended key life, improved typing experience, easy replacement repair of switches, cost-effectiveness, and enhanced functionality.

Mechanical keyboards are computer keyboards with switches under every single key, unlike the rubber membranes used in traditional keyboards. The physical switches in these keyboards give the user a 'mushy' feel and each keypress is clearly felt. Mechanical keyboards are ideal for fast and accurate typing, and their growing popularity among touch typists, gamers, programmers, and others is a major factor contributing to revenue growth of this market. Growing demand for wireless mechanical keyboards, rise of the gaming industry, increasing demand among professional gamers, and growing use of e-learning institutes are some other important factors driving the global mechanical keyboard market revenue growth.

COVID-19 Impact Analysis:

Social distancing and restrictions severely disrupted businesses and operations

Lockdowns caused disruptions in transportation and logistics

Impacted manufacturing activities and mining operations globally

Took a toll on economy of various countries

Caused sudden and drastic downturn in economic activity

Disrupted agriculture, fisheries, dairy, and other sectors

Caused loss of employment and financial crisis

Supply impacts were further compounded owing to reduced disposable income

Emergence of variants continue to cause concerns and impact normal routines

Linear Switches Segment to Account for Fastest Revenue CAGR:

The linear switches segment dominated other segments in terms of revenue share in the global market in 2020. Significantly growing demand for mechanical keyboards with linear switches among professional gamers is a key factor expected to contribute to revenue growth of this segment. Linear switches provide faster and more precise key control in gaming and produce smooth and constant actuation.

North America Accounted for Largest Revenue Share in 2020:

Among regional markets, the North America mechanical keyboard market accounted for the largest revenue share in the global market in 2020. Growing demand for mechanical keyboards due to many advantages such as accurate typing, improved typing experience, and extended key life, rising popularity of these keyboards among gamers, programmers, and touch typists, increasing demand for wireless mechanical keyboards, thriving gaming industry in the region, and increasing number of professional gamers are major factors driving the North America market revenue growth.
