Due to Covid-19 Government initiatives to promote Rise in awareness regarding health & fitness

Fitness equipment are widely used for physical fitness, weight management, and improving body stamina & muscular strength. The commonly used fitness equipment are treadmills, stationary bicycles, stair climbers, and weightlifting machines. Rise in awareness regarding health & fitness, increase in obese population, government initiatives to promote healthy lifestyle, and increase in youth population are the major factors that drive the growth of the global fitness equipment market size. However, counterfeiting of fitness equipment is a key restraining factor of the market. On the contrary, upsurge in youth population, improved lifestyle, and rise in disposable income of individual in developing countries are anticipated to offer immense opportunities for the market players.

Rising Incidence of Diseases Leading to Increased Focus on Fitness equipment industry

An alarming rise in global obesity, especially in urban areas, supplements the growth of the fitness equipment industry. According to the WHO, there has been a startling increase in the number of obese people worldwide. In 2020, world's 39% of adults aged 18 years and above were overweight and 13% were obese. Obesity is associated to a number of health issues or disorders such as sudden cardiac arrest, hypertension, hypotension, and diabetes. Therefore, to lose weight, reduce stress, and improve blood circulation, obese people tend to use more of fitness equipment. Fitness equipment market trends such as self-care for health and virtual fitness training sessions are the major growth pillars to support the sales for these products.
