The synthetic dye and pigment market consists of the sales of synthetic dyes and pigments by entities (organizations, sole traders, or partnerships) that produce synthetic organic and inorganic dyes and pigments, such as lakes and toners (except electrostatic and photographic).

## [Global Synthetic Dye And Pigment Market Trends](#)

Many textiles companies are adopting eco-friendly dyes for producing textiles and fabrics. These companies do not use harmful dyes as they cause extensive damage to the environment and are known to cause skin allergies and respiratory diseases. Due to the positive environmental characteristics and low toxicity of eco-friendly dyes, many companies are moving toward eco-friendly organic dyes, though they are priced higher than inorganic dyes.
