Porter's five forces are covered in this report:

Supplier power:

Estimating how easy it is for suppliers to drive up costs. This is compelled by the: uniqueness of their service or product, number of suppliers of each important input, relative size & strength of the supplier, and price of changing from one supplier to another.

Buyer power:

An estimate of how easy it is for buyers to drive prices down. This is caused by each customer's importance to the association and the cost to the buyer of switching from one supplier to

another.

Competitive rivalry:

The primary driver is the number & capability of competitors in the industry. Many contenders providing undifferentiated products & services will reduce [KEYWORD] industry attractiveness.

The threat of substitution:

Where near substitute products exist in the enterprise, it raises the likelihood of consumers changing to options in response to price gains.

The threat of new entry:

The profitable industries attract new entrants, eroding profitability.
