The biolubricants market consists of sales of biolubricants by entities (organizations, sole traders, and partnerships) that are used as an alternative lubricant for industrial and maintenance applications because of their superior inherent qualities. These are functional fluids made from vegetable oils and downstream esters. They are produced by using raw materials including rapeseed oil, sunflower oil, palm oil, coconut oil, and animal fats and offer several advantages over conventionally used petroleum-based products. They are non-toxic, renewable, carbon-neutral, and environmentally friendly. They are also known as bio-lubes.

[Global Biolubricants Market Trends](#)

Product developments are a key trend gaining popularity in the biolubricants market. Major companies operating in the bio-lubricant market are focused on developing new products to strengthen their position.

[Global Biolubricants Market Segments](#)

By Base Oil: Vegetable Oil, Animal Fat, Others

By Application: Hydraulic Oil, Metalworking Fluids, Chainsaw Oil, Mold Release Agents, Two-Cycle Engine Oils, Gear Oils, Greases, Others

By End-User: Industrial, Commercial Transport, Consumer Automobile, Others

By Geography: The global biolubricants market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa. Among these regions, North America accounts for the largest share.
