The safes and vaults market consists of sales of safes and vaults by entities (organizations, sole traders, and partnerships) that refer to a secure storage system designed to store valuable assets such as money, jewels, valuable documents, and records. Safes and vaults are made up of thick and secure materials to provide protection from theft. Technologically advanced safes and vaults are present with various technology such as fingerprint access, fire-proof safe, flood-proof, and electronic safes.

## [Global Safes And Vaults Market Trends](#)

Fingerprint-based technologically advanced safes are a key trend in the safes and vault market. Fingerprint-based safes consist of a biometric fingerprint scanner, which scans and stores a detailed image of the fingerprint in encrypted digital format. Once the fingerprints are stored, the biometric scanner recognizes each user's fingerprint to provide safe and secured access to assets within the system.
