The teleradiology market consists of sales of teleradiology solutions by entities (organizations, sole traders, and partnerships) that refer to the transmission of radiological pictures from one site to another. Teleradiology is the process of analyzing medical pictures while a radiologist is not physically present in the area where the images are created. It is used in hospitals, mobile imaging firms, urgent care clinics, and even certain private practices. The main reason for using teleradiology is that having a radiologist on-site is expensive.
