The automotive keyless entry system market consists of sales of automotive keyless entry systems devices by entities (organizations, partnerships, and sole proprietors) that are used to remotely lock, unlock, and start the engine using radiofrequency signals, which have been widely applied in car engines to start and stop and also doors. It has various benefits for safety standards in autonomous driving platforms.

[Global Automotive Keyless Entry System Market Trends](#)

Technologically advanced in-vehicle security systems are seen as an immerging trend in the automotive keyless entry system market. Companies operating in the automotive keyless entry system market are focusing on providing technologically advanced in-vehicle security systems such as a keyless entry system with engine start/off, AC control, and other features. Automobile manufacturers who also provide this system are investing heavily in launching new car models and the new version of old car models with keyless entry technology. This eliminates the need for customers to buy keyless entry systems separately as the system is inbuilt within the vehicle
