

# Centraleyes Goes Live with the Most Advanced Vendor Risk Solution on the Globe

*Centraleyes announced this week the release of version 4.7 of its next-generation GRC platform.*

NEW YORK, NY, UNITED STATES, July 26, 2022 /EINPresswire.com/ -- The new release includes revolutionary updates to its [3rd-party and vendor risk](#) management solution.

The new additions to the platform enhances and magnifies the existing ability to manage vendor risk in a scalable and automated manner by leveraging both self-attestations and automated intelligence scans. In the latest release there are a number of ground breaking solutions including a 4th party and supply chain risk module, financial risk quantification, enhanced automated threat intel scanning including breach detection, credential theft, open ports and a lot more.

The latest version puts [Centraleyes](#) on the forefront of the TPRM solutions, enabling its customers to build an automated and scalable vendor risk program.

About Centraleyes:

Centraleyes is a next generation GRC platform that gives organizations an unparalleled understanding of their [cyber risk and compliance](#). The platform addresses the main pain points of GRC by providing no-code deployment with single-day implementation and onboarding, automation and orchestration of data collection and analysis, and real-time dashboards and reports that enable its customers to make smarter strategic decisions. This is truly cyber risk management reimaged.
