Free to Attend Edge Computing Event Arrives at the RAI, Amsterdam

Explore the latest trends and persepctives within the edge landscape at the RAI, Amsterdam on 20-21 September 2022.

AMSTERDAM, THE NETHERLANDS, July 22, 2022 /EINPresswire.com/ -- Edge industry experts along with Edge enthusiasts will all be heading to RAI Amsterdam on the 21st of September 2022 to take part in one of the biggest events involving Edge Computing. Networking, exchanging experiences and strategies, plus access to exciting sessions with industry leaders – all that and much more will be available to the visitors at this year's expo.

Edge Computing Expo Europe 2022

The expo offers the largest number of co-located events, allowing the visitors to explore a variety of fundamental technology solutions. Tickets will also allow access to the co-located conference tracks at AI & Big Data Expo, Blockchain Expo, IoT Expo and Digital Transformation Week!

> "We look forward to welcoming our visitors to the event to connect, network and learn about the latest trends within edge computing, plus perspectives on the edge landscape."
>
> *Lia Richards, Head of Conference*

Industry experts from Royal Schiphol Group, Spectro Cloud, SixSq, just to mention a few, will share their secrets about Edge Computing and its best use in their organisations. The newest application methods, insightful solutions, adoption trends and industry predictions – all that will be shared with the event visitors.

Speakers include:

• Chief Data Officer - Royal Schiphol Group
• Global IoT Platform Head - Bekaert
• Edge Platform Director - Wärtsilä Voyage
• Head of Automation and Industrial IT - ALD Vacuum Technologies GmbH
• Principal Consultant & Edge Practice Lead - STL Partners... and more!

This year's conference subjects will include, and will not be limited to:

• Enhancing predictive maintenance and industrial inspection via the Edge
• How to intergrade Edge capabilities into the enterprise
• Enhanced delivery of continuous monitoring and keeping up with increased data
• A closer look at multi-access Edge computing including efficiency, latency and accessibility pros and cons
• The benefit of de-centralised storage… and more!
